

Beyond Expectations:

Your Path to Precise and

Timely Software Development

Need software that meets your requirements, arrives on schedule and maintains a high standard of quality?

Discover a comprehensive software development partner with our company. We specialize in end-to-end solutions, employing Agile cross-functional teams to drive development initiatives across all project phases. Our range of services spans from ideas to software reality - covering conceptualization, prototyping, development, deployment, and maintenance. We employ diverse methodologies and tools to meticulously execute each development phase with precision, on time, within budget resulting in top-tier software that aligns with your needs.

Join us

on a transformative journey where we empower your business with innovative software solutions to drive growth and redefine your digital possibilities in product development.

Customized Solutions

Your vision is unique, and so are our solutions. Through the Discovery & Planning phase we analyse your specific project scope, goals, and requirements and design a customized roadmap to bring your concept to life.

Strategic Analysis

We explore user requirements, business objectives, and technical potentials to offer insights that propel your project ahead. Our aim is not just to develop your software, but to strategically position it for success.

Design Innovation

With an eye for innovation, our Design phase focuses on creating user-centric interfaces, seamless user experiences, and robust system architectures. Your end-users will love the way they interact with the final product.

Expert Development

Our coding wizards transform ideas into functional code, masterfully weaving together diverse software components to build a powerful, scalable product.

Rigorous Testing

Quality is non-negotiable. Our exhaustive testing process, which includes functional, non-functional, integration, performance and user acceptance testing, ensures that your product or software performs flawlessly in real-world scenarios.

Seamless Deployment

Launch day is where your success story begins. We expertly manage deployment, ensuring flawless installation, configuration, and comprehensive services like monitoring, backup, and disaster recovery for sustained functionality and security.

Ongoing Support

Quality is non-negotiable. Our exhaustive testing process, which includes functional, non-functional, integration, performance and user acceptance testing, ensures that your product or software performs flawlessly in real-world scenarios.

A carsharing mobility platform for professionals

Challenge

RCI Mobility is a startup powered by RCI Bank and Services, that changed their name to Glide. Their portfolio includes an extended range of mobility services in France and internationally, with clients in several European countries.

Our client needed a complete mobility as a service solution (MaaS) to improve people's lives, daily transportation to work, and provide an environmentally-friendly ecosystem.

Solution

We conducted an architecture analysis, devised a technical plan, and assisted the client in refactoring their business processes to enable smooth communication between microservices, ensure data consistency, and develop complex business processes with enhanced visibility and agility.

Glide incorporated key technological features such as vehicle planning, damage management, flexible pricing rules, Bluetooth user journey, back-office geolocalization, and a mobile application, with ongoing implementations aimed at a broader audience and seamless feature development.

Results

Mobility as a service running in 4 countries

Stable, scalable, data-consistent platform

The client can integrate various services on the platform and allow a better communication between microservices

After almost 7 years of close collaboration with PitechPlus, I can declare this was an amazing journey we had together and with still many challenging but motivating years to come. PitechPlus team was with us at our initial phase for architectural setup, but due to their high level of professionalism and competency, they assisted us all along our development phase as well. We could not have managed such a quick platform growth without the presence of PitechPlus.

Vincent LENGLET

Product and Innovation Director

Discover the full portfolio and power of PitechPlus Services!

We've earned a reputation for enabling our clients to enhance their businesses with improved efficiency and increased value, becoming their trusted technological partner. In addition to our commitment to excellence, we also work with skilled peers who specialize in state-of-the-art technologies to expand our software development expertise and knowledge.
